|---|---|
| Wydanie pierwsze | Oddano do składania 13.X.55. |
| Nakład 500+45 | Podpisano do druku 1.XII.55. |
| Ark. wyd. 38,1 druk. 27 4/8 | Druk ukończono w styczniu 1956. |
| Pap druk. sat. kl. V, 70 g, 61×86/8 | B-6-52652 |
| Zamówienie TT/244/55 K 2056 | |

Drukarnia im. Rewolucji Październikowej w Warszawie — Zam. 1390a/55

# WSTĘP

*Rocznik 1952 jest siódmym z kolei opublikowanym zestawieniem spostrzeżeń fenologicznych dokonanych po wojnie na terenie Polski.*

*Rocznik ten został opracowany na podstawie materiału nadesłanego przez obserwatorów z 595 stacyj rozmieszczonych na obszarze całego kraju.*

*Wyniki spostrzeżeń fenologicznych opracowano w Roczniku w sposób podobny jak w latach poprzednich. Uwzględniono w nim te same obiekty, które umieszczono w rocznikach 1952 i 1951.*

*Nadesłany przez obserwatorów materiał fenologiczny został przeanalizowany i usystematyzowany. Nie uwzględniono w nim obiektów, które były obserwowane tylko w nielicznych miejscowościach. Natomiast przy danych wątpliwych umieszczono znak zapytania.*

*Cały materiał zgrupowano w 11 tablicach, w których nazwy stacyj zostały ułożone województwami w porządku geograficznym, zaś nazwy powiatów w obrębie województw i miejscowości w obrębie powiatów — alfabetycznie.*

*Wyniki spostrzeżeń fenologicznych podzielono na dwie części:*

*część I grupuje obserwacje fitofenologiczne,*

*część II obejmuje dane zoofenologiczne.*

*W części I ujęto spostrzeżenia w 3 następujące grupy:*

*A. Tablice I i II zawierają notowania spostrzeżeń fenologicznych roślin dziko rosnących i hodowanych.*

*B. Tablice III, IV, V i VI zawierają notowania spostrzeżeń fenologicznych roślin rolniczych. Przy tym w tablicy III umieszczono również terminy wykonywania robót polnych. Poza tym w tablicach III, IV i V podano odmiany roślin rolniczych i czas ich dojrzewania, chociaż nie były one notowane we wszystkich punktach obserwacyjnych. W rubryce „czas dojrzewania" znajdują się skróty oznaczające: w. — wcześnie, św. — średnio wcześnie, ś. — średnio, śp — średnio późno i p — późno.*

*C. Tablice VII, VIII, IX i X grupują spostrzeżenia fenologiczne drzew owocowych najbardziej rozpowszechnionych na obszarze Polski.*

*Część II zawiera spostrzeżenia fenologiczne świata zwierzęcego. W tablicy XI zamieszczone są przyloty niektórych ptaków, pierwsze pojawy owadów (pszczoły i osy pospolitej) oraz jednego z płazów — żaby.*

*Przed tablicami został umieszczony alfabetyczny spis stacyj fenologicznych, w którym dla każdej miejscowości podano: współrzędne geograficzne, wysokość nad poziomem morza oraz stronicę, gdzie podano wyniki spostrzeżeń z danej miejscowości.*

*Rocznik został wykonany w Dziale Meteorologii i Klimatologii Rolniczo-Leśnej i Fenologii PIHM.*

*W opracowaniu materiałów i ich przygotowaniu do druku brali udział pracownicy tego Działu: mgr inż. Henryk Szpringer, inż. Bogna Salińska i Mirosława Małecka.*

Dyrektor PIHM

(—) Prof. dr Wincenty Okołowicz
